| *12th CBSE-* **Percentage** *-* **89.8** | *Faridabad, Haryana* |
| **Dynasty International School** | **March 2017 – April 2018** |
| *10th CBSE-* **Percentage** *-* **89.6** | *Faridabad, Haryana* |

## Experience

**Mazinda** 🔗      **September 2022 – October 2022**
*Front-end Developer Intern*      *Remote*
- An E-commerce start-up which is giving lots of local vendors opportunity to sell their products online.
- Collaborated with UI/UX designers to create visually appealing interfaces, seamlessly integrated front-end components with back-end developers, and led initiatives for optimizing performance, resulting in reduced page load times.
- Employed HTML, CSS, and JavaScript as primary development languages, utilizing Git as the version control system for to organizing modifications and assigned tasks.

**Internshala** 🔗      **May 2022 – July 2022**
*Web Development Trainee*      *Remote*
- I learned lots of technical skills related to Web Development like HTML, CSS, JavaScript, AJAX, React etc.
- Utilized Visual Studio Code as a development environment inorder to visualize the web application.
- Learned about the different stages conducted by the company throughout the recruitment process and the duties essential for fulfilling our roles.

## Projects

**Blogie** 🔗 / *HTML, CSS, JSX, JWT Authentication, Express.js, React.js, Material UI*      **October 2023**
- This platform serves as a valuable space for creators and explorers to share their thoughts and experiences.
- Crafted appealing blog layouts with React, prioritizing user experience. Implemented MongoDB for efficient data storage and manipulation.
- Implemented secure user authentication for blog functions, prioritizing data protection. Enhanced performance for faster page loading and an improved user experience.

**Ipod** 🔗 / *React.js, JSX, JavaScript, Zingtouch, Helmet*      **September 2023**
- Used React.js to create a dynamic web app with an immersive, visually appealing interface inspired by the iconic iPod. Implemented intuitive navigation controls for a classic scroll-wheel experience.
- Effectively managed application state using React state and props, ensuring real-time updates and synchronization with user interactions.
- Emphasized responsive design for consistent user experience on diverse devices. Integrated audio playback for users to control music within the web app.

**Foodie** 🔗 / *HTML, CSS, JavaScript*      **July 2022**
- Web app aimed for seamless, visually engaging user experience in menu browsing, order placement and much more.
- Designed intuitive navigation, optimizing the customer journey from menu exploration to order placement, and integrated interactive elements to enhance user engagement.
- It's future expectation may include integrating back-end to this and implementing predictive algorithms to anticipate user preferences and suggest items for order, simplifying the decision-making process for users.

## Technical Acknowledgements

**Languages**: C, C++, HTML, CSS, JavaScript, SQL, Java
**Technologies/Frameworks**: ReactJS, NodeJS, ExpressJS, GitHub, JQuery,MongoDB
**Coursework**: Data Structures, Algorithm Analysis, Operating System, DBMS, OOPS, Web Development
**Platforms**: Github, Leetcode, GFG, Naukari.com

## Certifications

- DSA by Abdul Bari from Udemy 🔗
- Full Stack Web Development by Angela Yu from Udemy 🔗
- Hacktoberfest Open Source Contribution 🔗
- IEEE T-HackS Hackthon 🔗
- NSS Web Development Head 🔗
